

ZACHARY GROVES

zlgroves@crimson.ua.edu | 201-913-9890 | linkedin.com/in/zachary-lyle-groves | zgroves24.github.io

EDUCATION

The University of Alabama | B.S. Computer Engineering, STEM-to-MBA Honors Program May 2028
GPA: 3.92/4.00 | Minors: Mathematics & Computer Science | Honors College, Presidential Scholar
Relevant coursework: Data Structures, Digital Logic, Circuit Analysis

TECHNICAL SKILLS

Languages: Python, Swift, C/C++, JavaScript/TypeScript, SQL, HTML/CSS
AI & Automation: RAG, LLM agents, OpenAI/Claude/Gemini APIs, custom GPTs, n8n, Google Document AI
Product & Infrastructure: SwiftUI, Supabase/Postgres, Next.js, Vercel, Stripe, Git

EXPERIENCE

AI Engineering Intern, Information Services Group (ISG) | Stamford, CT Jun 2026 - Aug 2026

- Designed and built a governed custom-GPT intake and lifecycle workflow in n8n, routing new, updated, and retired requests through risk, quality, remediation, approval, and retirement paths.
- Built an AI advisor-intake system that turns client context into reusable client and opportunity intelligence for proposals and statements of work.
- Researched token efficiency and model selection across enterprise AI workstreams and authored OpenAI Enterprise guidance for effective, responsible use.

Founder & Software Engineer, GradePath | Tuscaloosa, AL Apr 2025 - Present

- Founded GradePath and build a native iPhone course workspace in SwiftUI with Supabase/Postgres and AI workflows as the sole founder and developer.
- Built private course capture and organization so students can keep selected class material structured by course.
- Built source-grounded Tutor so students can ask questions against material they choose, plus class-specific note sharing with classmates.
- Lead product work end to end across user discovery, mobile UI, backend services, testing, release decisions, and iteration from student feedback.

Undergraduate Researcher, Digital Twin & VR Rehabilitation Lab | Tuscaloosa, AL Feb 2026 - Present

- Develop AI-driven gait-assessment workflows using depth-camera motion tracking and 3D pose estimation for real-time symmetry and alignment analysis.
- Analyze biomechanical joint kinematics in an Unreal Engine digital twin that mirrors patient treadmill movement.
- Automate data-collection and processing workflows for rehabilitation research using real-time motion data.

Electrical Team Member, Battery Workforce Challenge | Tuscaloosa, AL Jan 2025 - May 2026

- Evaluated high-voltage electrical components and integration requirements for an EV battery-pack system on a multidisciplinary engineering team.
- Analyzed electrical requirements to support battery-pack design, testing, and system safety.

LEADERSHIP & RECOGNITION

President, UA Artificial Intelligence Club | Tuscaloosa, AL Jun 2026 - Present

- Lead a 300+ member student organization focused on practical AI literacy, hands-on tool use, and responsible adoption across majors.
- Set executive priorities and coordinate speakers, campus programming, workshops, and student project opportunities.

President, Alabama ACHA M3 Hockey | Tuscaloosa, AL Mar 2026 - Present

- Manage team operations and a \$130,000+ annual budget across university administration, league communication, scheduling, and travel.
- Serve as a liaison among players, coaches, ACHA officials, opposing schools, and university leadership.

Entrepreneurial Lead, NSF I-Corps / Aldag Competition | Tuscaloosa, AL Mar 2025 - Aug 2026

- Conducted 50+ customer-discovery interviews and led business-model development for an AI education startup that placed second in the Aldag Business Competition.
- Used NSF I-Corps research methods to turn customer evidence into product and market decisions.

SELECTED AI PROJECTS

Local Codex Router: Built a local-first routing layer for summaries, log triage, repository scouting, visual QA, and memory search with usage instrumentation.

Agent Operator Skills: Built a reusable AI-agent toolkit with verification gates for planning, output auditing, security review, and multi-step coding workflows.

AI Educator's Toolkit: Developed a Gemini-powered web app for lesson plans and text-based assessments, shaped by NSF I-Corps customer discovery.

Honors: President's List; Honors College; Presidential Scholar; BIG Ideas Competition Phase II Finalist.
